# 1. Investment Objective Overview

The Units in Sequoia Commodities Series 3 offer 100% leveraged exposure to the BNP Paribas Energy & Metals Enhanced Roll ER Index ("**the Reference Asset or Index**") with a 15% Target Volatility mechanism over a 2 year period and the potential to receive an uncapped Performance Coupon at Maturity dependent on the Strategy Value Performance, adjusted for changes in the AUD/USD exchange rate during the Investment Term.

The Index offers a long only, diversified exposure to the commodity asset class, excluding Agriculture and Livestock. The key features of Index are outlined below:

- Diversification across 3 commodity sectors using the same level of sector diversification as the industry benchmark commodity index known as the as the Bloomberg Commodity ex- Agriculture and Livestock Capped Total Return Index ("**The Industry Benchmark Index**"):
  - 1) Industrial Metals;
  - 2) Precious Metals; and
  - 3) Energy

As at 15 April 2021, the sector allocation of the Index was:

- Diversification across 12 individual commodities and cash:
  - 1) Copper
  - 2) Zinc
  - 3) Aluminium
  - 4) Nickel
  - 5) Gold
  - 6) Silver
  - 7) WTI Crude Oil
  - 8) Brent Crude Oil
  - 9) Gasoline
  - 10) Low Sulphur gas Oil
  - 11) ULS Diesel
  - 12) Natural Gas
  - 13) Cash
- The individual commodity weights within the Index are calculated by reference to the following:
  - 1) As a first step it uses the same weights as those included in the Industry Benchmark Index. The Industry Benchmark Index uses liquidity and production data to determine the weights of each commodity within that index;
  - 2) As a second step, a daily weight capping mechanism is applied to ensure that the sum of the weights for all commodities included within the Energy sector does not exceed 35% and that no individual commodity within the Index exceeds 20% on a daily basis. As at 15 April 2021 the weights for this were as follows:

- Exposure to individual commodities is obtained by entering into futures contracts on each individual commodity. This is because futures contracts are the only way of obtaining exposure to commodities in cases where investors are unable to acquire the physical commodities themselves.
- When using futures contracts, it is necessary to “roll” each futures contracts before expiry in order to avoid the physical delivery obligations of such contracts. To help optimise exposure to a futures contract during a roll, the Index uses the S&P GSCI Dynamic Roll Indices (Dynamic Roll Indices) for each single commodity (excluding Gold & Silver) to identify the most efficient futures contract in the series. The Dynamic Roll Indices employ a flexible futures contract rolling strategy designed to alleviate the negative cost of rolling futures contracts during certain market environments known as a contango market or maximising the roll gains during less common market environments known as backwardation. The aim is to select those individual futures contracts for each commodity that are expected to have the lowest roll cost or even the highest roll gains. As at 15 April 2021 the weights across each commodity through each Dynamic Roll Index was as follows:

Underlying	Bloomberg Code	Relative Weight
GSCI GOLD ER	SPGSGCP Index	19.58%
GSCI SILVER ER	SPGCSIP Index	7.19%
S&P GSCI Brent Crude Dynamic Roll Index ER	SPDYBRP Index	9.41%
S&P GSCI Crude Oil Dynamic Roll Index ER	SPDYCLP Index	11.42%
S&P GSCI GasOil Dynamic Roll Index ER	SPDYGOP Index	3.56%
S&P GSCI Heating Oil Dynamic Roll Index ER	SPDYHOP Index	2.89%
S&P GSCI Unleaded Gasoline Dynamic Roll Index ER	SPDYHUP Index	3.38%
S&P GSCI Aluminum Dynamic Roll Index ER	SPDYIAP Index	8.34%
S&P GSCI Copper Dynamic Roll Index ER	SPDYICP Index	10.68%
S&P GSCI Nickel Dynamic Roll Index ER	SPDYIKP Index	4.25%
S&P GSCI Zinc Dynamic Roll Index ER	SPDYIZP Index	5.57%
S&P GSCI Natural Gas Dynamic Roll Index ER	SPDYNGP Index	13.74%

- USD exposure thereby allowing the Units to perform well if the AUD/USD depreciates during the investment term;
- High liquidity as it only provides exposure to widely traded commodities;

This Index has been created by BNP Paribas S.A. which is a French international banking group. It is a leading bank in the Eurozone and a prominent international banking institution.

<b>Currency Exposure</b>	The potential Performance Coupon at Maturity is adjusted for changes in the AUD/USD exchange rate during the Investment Term. Otherwise, there are no other currency exposures.
<b>Final Value</b>	\$1.00 per Unit on the Maturity Date.  The returns on the Units will be made up of the Final Value per Unit and any Performance Coupon payable at the end of the Investment Term (if any) based on the performance of the Reference Asset.
<b>Potential Performance Coupon at Maturity</b>	Calculated by reference to the Strategy Value Performance on the Maturity Date adjusted for changes in the AUD/USD Exchange Rate during the Investment Term.  <i>Refer to “Section 3: Formulae and Calculations” for Performance Coupon formulae</i>

**Strategy Value Performance at Maturity Date**

The percentage amount from the following calculation:

$$\frac{\text{Final Strategy Value} - \text{Initial Strategy Value}}{\text{Initial Strategy Value}}$$

*Refer to "Section 3: Formulae and Calculations" for Performance Coupon formulae*

**Initial Strategy Value**

100

**Final Strategy Value**

The Strategy Value at Maturity

**Strategy Value**

The Strategy Value is dependent on the Units' varying levels of exposure to the relevant Reference Asset. This varying level of exposure is determined by the Participation Rate, which is calculated by reference to the Target Volatility, and the maximum of the volatility of the Reference Asset calculated each day for the previous 20 Scheduled Business Days. The volatility measure that is calculated on each day for the previous 20 Scheduled Business Days is the volatility of the Reference Asset calculated by reference to the previous 20 Scheduled Business Days.

The Strategy Value is used to determine the value of the Performance Coupon, if any.

The Strategy Value is calculated each Scheduled Business Day by:

- taking the change in the level of the relevant Reference Asset from the close of the previous Scheduled Business Day to the close of the current Scheduled Business Day,
- multiplying it by the Participation Rate (which determines the exposure to the relevant Reference Asset) from the previous Business Day,
- multiplying this amount by the Strategy Value from the previous Business Day.

The effect of this is that as the volatility of the Reference Asset increases above the level of the Target Volatility, exposure to the Reference Asset decreases, and vice versa. In this way the Strategy Value will vary from one Scheduled Business Day to the next depending on the change in the level of the Reference Asset and the Participation Rate.

The Issuer intends to publish the Strategy Value (on a monthly basis) on its website at [www.sequoiasi.com.au](http://www.sequoiasi.com.au).

**Participation Rate and Target Volatility**

Volatility is the relative rate at which the price of an asset may move (increasing or decreasing), over a period of time. The greater the amount and frequency of an asset's relative price changes (either positively or negatively) over a period of time, the higher the volatility. The higher the volatility of an asset the greater the perceived risk.

The Participation Rate is a mechanism designed to manage market risk associated with the performance of the Reference Asset. It operates by varying the exposure that the Units will have to the Reference Asset depending on the volatility of the Reference Asset and the Target Volatility. The higher the volatility, the lower the Participation Rate (and hence the lower the exposure to the Reference Asset) and vice versa.

Target Volatility is the level of volatility that would provide a Participation Rate of 100%. The Units have a maximum Participation Rate of 125%.

The Participation Rate is determined on each Scheduled Business Day by reference to the highest volatility of the Reference Asset calculated on each day for the past 20 Scheduled Business Days. The volatility measure that is calculated on each such day for this purpose is the volatility of the Reference Asset over the previous 20 Scheduled Business Days.

The Participation Rate will vary between 0% and 125%.

*Please refer to Section 3 "Formulae and Calculations" for more information.*

<b>Realised Volatility</b>	<p>Realised Volatility(t) ("RV<sub>t</sub>") is the maximum of the volatility of the Reference Asset calculated on each day for the previous 20 Scheduled Business Days.</p> <p>The volatility measure that is calculated on each such day for this purpose is the volatility of the Reference Asset over the previous 20 Scheduled Business Days.</p> <p><i>Please refer to Section 3 "Formulae and Calculations" for more information.</i></p>
<b>Maximum Participation Rate</b>	125%
<b>Participation Rate</b>	<p>The Participation Rate will be calculated by reference to the Target Volatility and Realised Volatility as described above using the following formula:</p> $PR_t = \text{Min (Maximum Participation Rate, Target Volatility/Realised Volatility)}$ $PR_t = \text{Min (125\%, Target Volatility/Realised Volatility)}$ <p>Based on this, the Participation Rate (PR<sub>t</sub>) would have 80.12% as at the 19 April 2021 due to Realized Volatility of 18.72%.</p> $PR_t = \text{Min (125\%, 15\%/18.72\%)} = 80.12\%$ <p>Investors should note that there may be a risk that the level of volatility will be high throughout the majority or whole of the Investment Term. Should this occur, the Participation Rate may result in less than 100% exposure to the Reference Asset throughout the majority or whole of the Investment Term. The minimum Participation Rate is 0% which means that Investors have no exposure to the Reference Asset.</p> <p><i>Please refer to the Formulae and Calculation Table in Section 3 for the formula that shows how measured volatility is calculated.</i></p>
<b>Loan Amount</b>	\$1.00 per Unit
<b>Interest Rate &amp; Prepaid Interest</b>	<p>The interest rate in respect of the Loan is 6.2% p.a.</p> <p>The Prepaid Interest is paid upfront for the full 2 year Investment Term.</p> <p>Prepaid Interest per Unit:</p> $= 6.2\% \text{ p.a.} \times 2 \text{ years} \times \$1.00 \text{ per Unit}$ $= \$0.124 \text{ per Unit for the Investment Term of 2 years.}$ <p>The Prepaid Interest must be paid to the Issuer by the Application Payment Date.</p> <p>Therefore, if you invested the Minimum Investment Amount of \$50,000 for the Units, in addition to any Fees paid in relation to the Units, you would pay Prepaid Interest of \$6,200 on the Application Payment Date.</p>
<b>Issue Price</b>	\$1.00 per Unit
<b>Listing</b>	The Units will not be listed or displayed on any securities exchange.
<b>Currency</b>	Australian dollars
<b>Minimum Investment Amount</b>	\$50,000 per Series at the Issue Price of \$1.00 per Unit.
<b>Withdrawal of the Units</b>	<p>If the Issuer is unable to achieve the economic exposure described in this PDS on the Commencement Date due to any condition set out in this PDS not being satisfied (e.g. the Issuer being unable to hedge its obligations), or otherwise determines not to proceed with the issue for any reason, then the Issuer will terminate any Units already issued, and return the Prepaid Interest and Fees without interest. The Loan will be terminated and no drawdown will be made.</p>

#### Minimum Buy-Back Amount

50,000 Units per Series providing Investors continue to hold at least 50,000 Units in the relevant Series. In the event that an Investor makes an Issuer Buy-Back Request which would result in the Investor holding less than 50,000 Units in a particular Series, then the Issuer will notify the Investor that it will hold less than 50,000 Units and seek the Investor's instruction whether to buy back the Investor's entire holding in that Series or reject the request.

#### Minimum Early Maturity Value, Termination Payment and Buy-Back Price

\$1.00

If the Units mature early for any reason, you will receive an Early Maturity Value of \$1.00 which will be applied to your Loan. You will not have to pay any other fees, costs or interest.

Investors will not be entitled to a refund of any Prepaid Interest or any other Fees paid in relation to the Units and will not be entitled to any Performance Coupons or payment of the Final Value (as the Final Value of \$1.00 will be used to pay off your Loan).

Please refer to Section 1.10 "Early Maturity" of the Master PDS for more information on when the Units can mature early.

#### Beneficial Interest

The Beneficial Interest in a Portion of the Delivery Asset held for each Unit an Investor holds. The Beneficial Interest will be set out in the Confirmation Notice sent to Investors and is a feature of the product designed to ensure the Units are a "security" under the Corporations Act.

#### Delivery Asset

Telstra Corporation (TLS.AU).

On Maturity, the Issuer intends to deliver a parcel equal in value to the Final Value per Unit multiplied by the number of Units held by an Investor ("**Delivery Parcel**") containing ordinary shares in Telstra Corporation (ASX Code: TLS, website: [www.telstra.com.au](http://www.telstra.com.au)) ("**Delivery Asset**").

You should be aware that the Issuer can change or substitute the Delivery Asset in certain circumstances, and you should take this into account when considering whether to invest in the Units.

#### Agency Sale Option

Available.

*Please refer to Clause 4.4 of Section 6 "Terms of the Deferred Purchase Agreement" in the Master PDS.*

#### Key Risks

Key risks include:

- Your return (including any Performance Coupon) is affected by the performance of the Reference Asset and the Strategy Value Performance. There is no guarantee that the Reference Asset nor the Strategy will perform well.
- The Units have varying levels of exposure to the Reference Asset depending on volatility due to the variable Participation Rate. It operates by varying the exposure that the Units will have to the Reference Asset depending on the Realised Volatility of the Reference Asset and the Target Volatility. There is the risk that the Participation Rate could drop to significantly below 100% during the Investment Term in which case Investors will not gain the full benefits of an increase of the value of the Reference Asset.
- Investors should note that there is a lag in measuring the Realised Volatility of the Reference Asset. This means that where there has been a period of high Realised Volatility, the Investor's exposure to the Reference Asset will be low, regardless of whether the Reference Asset is performing positively or negatively.
- There will be no Performance Coupon payable if the Strategy Value Performance is negative on the Maturity Date
- The potential Performance Coupon is determined by reference to the Strategy Value Performance as well as changes in the AUD/USD exchange rate. An increase in the AUD/USD exchange rate between the Commencement Date and the Maturity Date will reduce the Performance Coupon whilst a decrease in the AUD/USD rate between the relevant dates will lead to an increase in the Performance Coupon;

- There is no guarantee that the Units will generate returns in excess of the Prepaid Interest and Fees, during the Investment Term. Additionally, in the event of an Investor requested Issuer Buy-Back or Early Maturity Event, you will not receive a refund of your Prepaid Interest or Fees.
- Gains (and losses) may be magnified by the use of a 100% Loan. However, note that the Loan is a limited recourse Loan, so you can never lose more than your Prepaid Interest Amount and Fees paid at Commencement.
- Investors are subject to counterparty credit risk with respect to the Issuer and the Hedge Counterparty; and
- the Units may mature early following an Early Maturity Event, including an Adjustment Event, Market Disruption Event or if the Issuer accepts your request for an Issuer Buy-Back.

Please refer to Section 2 "Risks" of the Master PDS for more information.

## Fees

The following Fees are payable in respect of the Units:

**Upfront Adviser Fee (if any):** You may nominate an Upfront Adviser Fee to be paid to your Adviser in the Application Form attached to this Term Sheet PDS. The Issuer will deduct any Upfront Adviser Fee from the Total Payment Amount and pay it to your Adviser in accordance with the terms of this PDS.

**Application Fee:** The Issuer charges an Application Fee of 1.55% of the Issue Price of each Unit, i.e. \$0.0155 per Unit. The Issuer may agree with your Adviser to forgo part or all of the Application Fee at the Issuer's absolute discretion.

Assuming you nominated an Upfront Adviser Fee of \$775, and you applied for 50,000 Units in Series 3, in addition to the Prepaid Interest you would pay fees of:

Application Fee	= 50,000 x \$0.0155	= \$775
Upfront Adviser Fee		= \$775
<b>Total</b>		<b>= \$1,550</b>

Total Investment Cost	Type of Cost	Cost per Unit
	Prepaid Interest	\$0.124
	Application Fee	\$0.0155
	<b>Total:</b>	<b>\$0.1395</b>

## Derivatives

The Issuer obtains exposure to the Strategy Value through the use of derivatives rather than a direct investment in the Strategy Value.

## Taxation

Please refer to Section 4 "Taxation" of the Master PDS.

## Applications and issue of Units

Applications may be accepted or rejected at the discretion of the Issuer. Units will be issued within one month upon receipt of application monies from an Investor. The Unit's economic exposure to the Reference Asset will begin on the Commencement Date. If a Unit is issued prior to the Commencement Date, it will have no economic exposure until the Commencement Date.

The Sequoia Commodities Series 3 Units will only be issued at the discretion of the Issuer, and applications may be accepted or rejected at the discretion of the Issuer. Without limiting its discretion, the Issuer may choose not to proceed with the issue of the Units for a Series and terminate the product for those Units already issued for any reason whatsoever, including (without limitation) if there is a significant change in the Issuer's cost of hedging between the date of this PDS and the Commencement Date. Where the Issuer has not received the Prepaid Interest, Application Fee or Upfront Adviser Fee (if any) in respect of a Unit(s) from the Investor by the Application Payment Date, the Issuer will cancel the Units relating to the unpaid amounts and will arrange for the Investors name to be removed from the register of Unitholders.

If a decision is made for any reason not to issue, or not to proceed with the issue of the Units in Series 3, the Issuer will return the Prepaid Interest, Application Fee and Upfront Adviser Fee (if any) to applicants (without interest) within 10 Business Days of the scheduled Commencement Date and any Units already issued will be terminated.

The Units may mature early in the case of an Early Maturity Event or Issuer Buy-Back, and the Maturity Date may be extended in the case of a Market Disruption Event.
