In particular, the Issuer will not continue with the issue of a Series of Units if it considers that it and its affiliates have not completed sufficient arrangements for management of their respective obligations in respect of that Series of Units. If a decision is made not to issue a Series of Units or to terminate Units in a Series that have already been issued, the Issuer will return the Prepaid Interest, and any applicable Fees that have been paid upfront to applicants without interest within 10 Business Days of the scheduled Commencement Date.

Nasdaq Global Indexes – Index Sponsor and Calculation Agent

Nasdaq Global Indexes is the Index Sponsor and Calculation Agent for the Nasdaq Yewno Global Innovative Technologies ER IndexSM.

Nasdaq Global Indexes has been creating innovative, market-leading, transparent indexes since 1971. Today, their index offering spans geographies and asset classes and includes:

- the NASDAQ-100 Index which includes 100 of the largest domestic and international non-financial companies listed on The NASDAQ Stock Market based on market capitalisation; and
- As a leader in trading technology from the outset, it was only fitting that the world's technology giants chose to list on the Nasdaq in their early days. As the technology sector grew in prominence in the 1980s and 1990s, the Nasdaq became the most widely followed proxy for this sector.

Nasdaq Global Indexes continuously offer new opportunities for financial product sponsors across a wide-spectrum of investable products and for asset managers to measure risk and performance. Nasdaq also provides ETP listings, custom index services and design solutions to financial organisations worldwide. The Nasdaq Yewno Global Innovative Technologies ER IndexSM is an example of a custom index designed in conjunction with Yewno Inc.

Yewno Inc – Using Artificial Intelligence to Identify the Most Innovative Companies

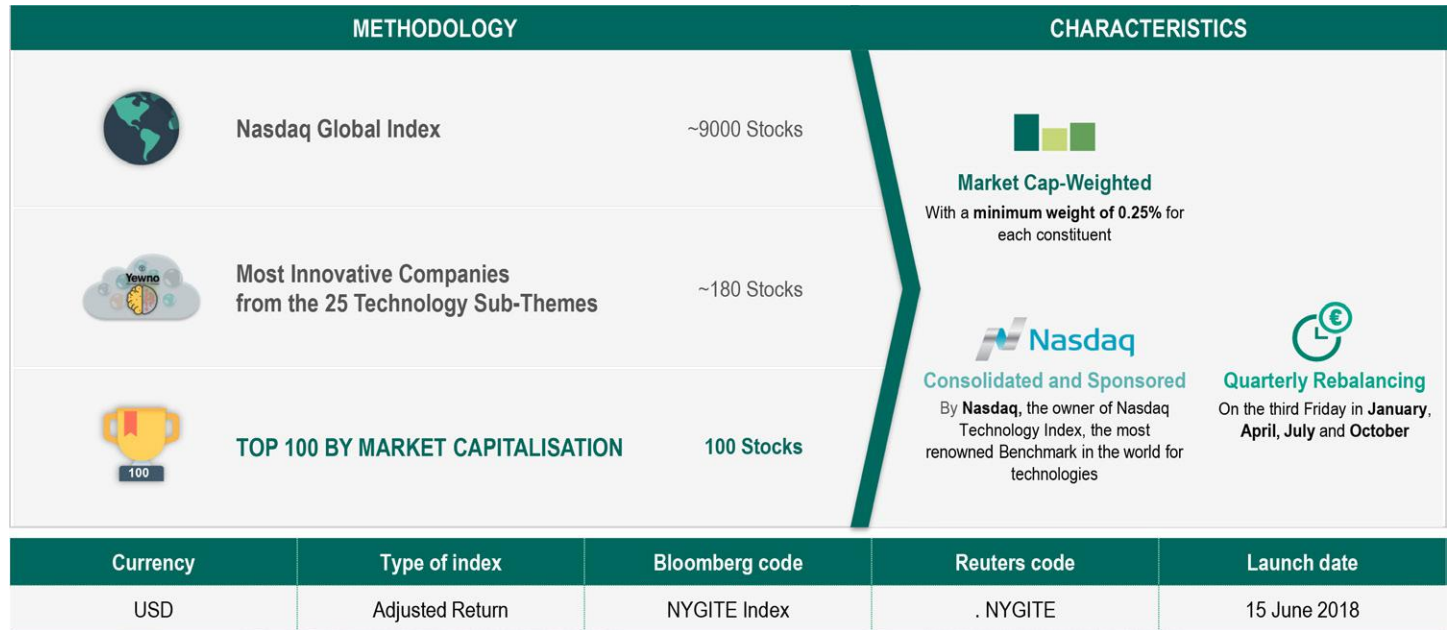

Yewno, Inc. is a Silicon Valley based start up and a leading provider of Computational Linguistics, Network Theory, Machine Learning, and Artificial Intelligence solutions that extracts insights and delivers products and services tailored to a number of industries, including Finance.

The Issuer understands that Nasdaq Global Indexes has partnered with Yewno Inc. with the aim of enhancing the benchmarking and classification of companies engaged in emerging and disruptive technologies across all industries.

Making use of Yewno Inc's Artificial Intelligence system, the Index analyses the extent to which a company has intellectual property and invests in research and development through their patent data linked to 6 innovative technologies (See table on page 5). Since research and development spending of a company is not necessarily reflected in its current revenue but is rather more likely realised in its future revenue, the Index relies on Yewno to select companies which are likely to be innovative in their space based on the patent's they own which are linked to the above 6 sectors and 25 sub-sectors.

Stock Selection Process

Index Methodology

Step 1: The universe of stocks used as the starting point for the stock selection process is the Nasdaq Global Index¹ including approximately 9,000 companies. The NASDAQ Global Index is a float adjusted market capitalisation-weighted index designed to track the performance of global equities covering over 98% of the entire listed market capitalisation of the global equity space.

Step 2: For the next step in the selection process, Nasdaq then considers the Top 25% companies in each sub-sector (refer table above), according to Yewno's Pure and Contribution scores:

- Pure score: number of patents in a particular sub-theme as a percent of all patents by a given company;
- Contribution score: number of patents identified as part of a sub-theme for a given company as a percent of all patents from all companies for a given sub-theme.

Step 3: The final step in the stock selection process, is to select the top 100 stocks from the pool of stocks selected under step 2, by reference to their market capitalisation. The index is composed of the Top 100 companies by market capitalisation.

Index Characteristics

Other characteristics of the Index include:

- **Market Cap weighted:** The weightings given to each stock in the Index is by reference to their market capitalisation, with a minimum weight of 0.25% per stock;
- **Quarterly rebalancing:** The stocks comprising the Index are rebalanced on a quarterly basis on the third Friday of January, April, July and October.

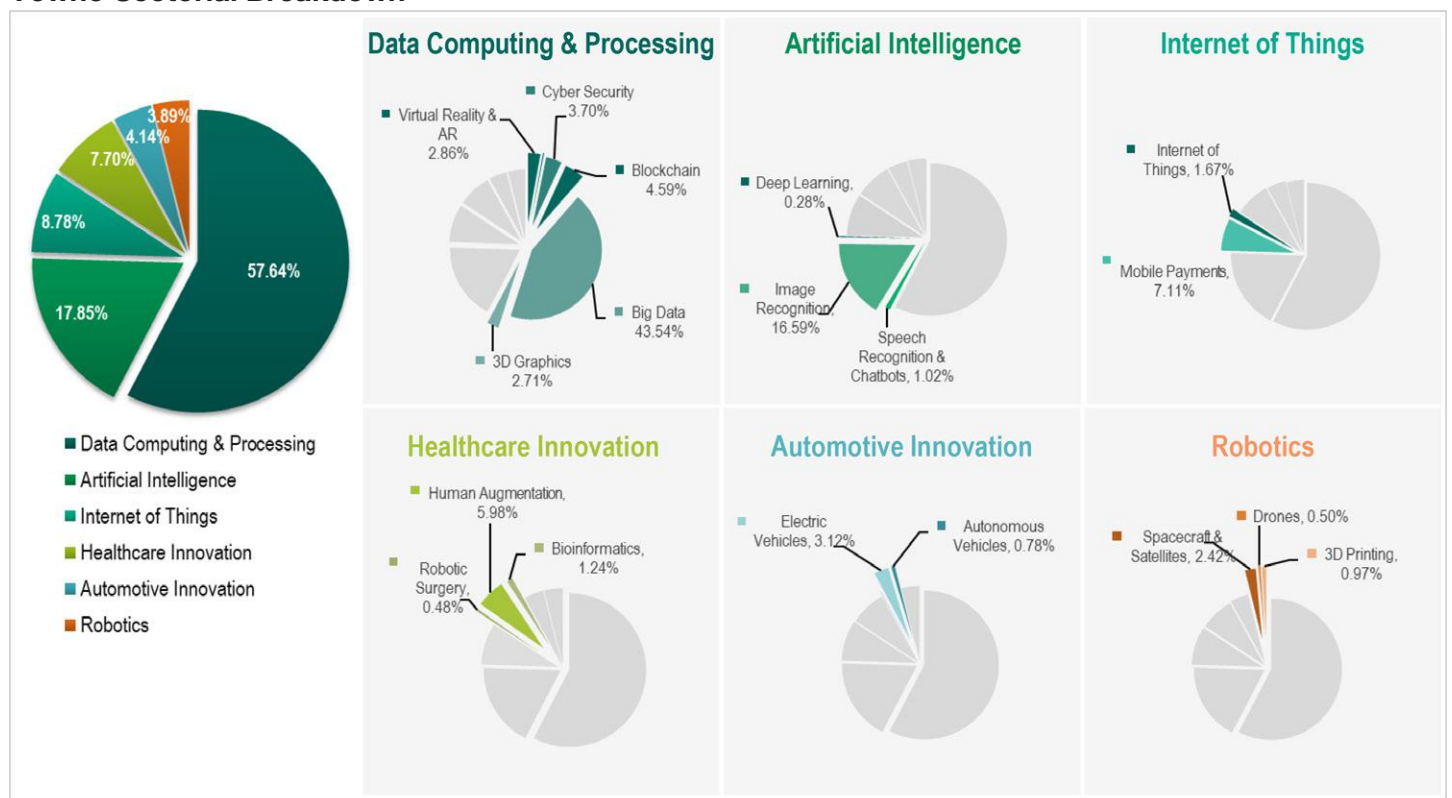

25 Innovative Sub-Themes

From the universe of world developed stocks, Yewno's AI-Augmented system is deployed to analyse the extent to which a company has intellectual property and invests in research and development through their patent data linked to the 6 innovative technologies, comprising 25 sub-themes.

**Section 5

Calculations**

**Master PDS
-Section 7
"Loan"**

**Minimum Early Maturity Value,
Termination Payment and Buy-
Back Price**

\$1.00

If the Units mature early for any reason, you will receive an Early Maturity Value of \$1.00 which will be applied to your Loan. You will not have to pay any other fees, costs or interest.

Investors will not be entitled to a refund of any Prepaid Interest or any other Fees paid in relation to the Units and will not be entitled to any Performance Coupon or payment of the Final Value (as the Final Value of \$1.00 will be used to pay off your Loan).

Please refer to Section 1.10 “Early Maturity” of the Master PDS for more information on when the Units can mature early.

Beneficial Interest

The Beneficial Interest in a Portion of the Delivery Asset held for each Unit an Investor holds. The Beneficial Interest will be set out in the Confirmation Notice sent to Investors and is a feature of the product designed to ensure the Units are a “security” under the Corporations Act.

Delivery Asset

Telstra Corporation (TLS.AU).

On Maturity, the Issuer intends to deliver a parcel equal in value to the Final Value per Unit multiplied by the number of Units held by an Investor (“**Delivery Parcel**”) containing ordinary shares in Telstra Corporation (ASX Code: TLS, website: www.telstra.com.au) (“**Delivery Asset**”).

You should be aware that the Issuer can change or substitute the Delivery Asset in certain circumstances, and you should take this into account when considering whether to invest in the Units.

Agency Sale Option

Available. Please refer to Clause 4.4 of Section 6 “Terms of the Deferred Purchase Agreement” in the Master PDS.

Key Risks

Key risks include:

- Your return (including any Performance Coupon) is affected by the performance of the Reference Asset. There is no guarantee that the Reference Asset will perform well.
- There will be no Performance Coupon payable if the performance of the Reference Asset is negative at Maturity.
- The potential Performance Coupon is determined by reference to the Reference Asset Performance on the Coupon Determination Date;
- There is no guarantee that the Units will generate returns in excess of the Prepaid Interest and Fees, during the Investment Term. Additionally, in the event of an Investor requested Issuer Buy-Back or Early Maturity Event, you will not receive a refund of your Prepaid Interest or Fees.
- Gains (and losses) may be magnified by the use of a 100% Loan. However, note that the Loan is a limited recourse Loan, so you can never lose more than your Prepaid Interest Amount and Fees paid at Commencement.
- Investors are subject to counterparty credit risk with respect to the Issuer and the Hedge Counterparty; and
- the Units may mature early following an Early Maturity Event, including an Adjustment Event, Market Disruption Event or if the Issuer accepts your request for an Issuer Buy-Back.

Please refer to Section 2 “Risks” of the Master PDS for more information.

Other Fees

The following other Fees are payable in respect of the Units (in addition to the Performance Fee, which is discussed below):

Upfront Adviser Fee (if any): You may nominate an Upfront Adviser Fee to be paid to your Adviser in the Application Form attached to this Term Sheet PDS. The Issuer will deduct any Upfront Adviser Fee from the Total Payment Amount and pay it to your Adviser in accordance with the terms of this PDS.

Application Fee: The Issuer charges an Application Fee of 1.65% of the Issue Price of each Unit, i.e. \$0.022 per Unit. The Issuer may agree with your Adviser to forgo part or all of the Application Fee at the Issuer's absolute discretion.

Assuming you nominated an Upfront Adviser Fee of \$825, and you applied for 50,000 Units in Series 3, in addition to the Prepaid Interest you would pay other Fees of:

Application Fee = 50,000 x \$0.0165 = \$825

Upfront Adviser Fee = \$825

Total = \$1,650

Currency Management Fee

There is a Currency Management Fee of 0.7% p.a. paid upfront for the full 2 year Investment Term in relation to the currency hedging arrangement implemented by the Issuer. Refer to "Currency exposure" above for more details.

Currency Management Fee per Unit = 0.7% p.a. x 2 years x \$1.00 per Unit = \$0.014 per Unit for the Investment Term of 2 years. The Currency Management Fee must be paid to the Issuer by the Application Payment Date.

Therefore, if you invested the Minimum Investment Amount of \$50,000 for the Units, in addition to any Interest and Other Fees paid in relation to the Units, you would pay a Currency Management Fee of \$700 on the Application Payment Date.

Total Investment Cost

Type of Cost	Cost per Unit
Prepaid Interest	\$0.1190
Currency Management Fee	\$0.014
Application Fee	\$0.0165
Total:	\$0.1495

Performance Fee

Any Performance Coupon payable at Maturity is subject to a 10% Performance Fee. The Performance Fee has the effect of reducing the gross amount of any Coupon payable to the Investor. For example, if a 10% gross Performance Coupon is payable, then the net Performance Coupon payable to the investor would be 9% after the deduction of the 10 % Performance Fee. If the Performance Coupon is 0%, then no Performance Fee is payable.

Derivatives

The Issuer obtains exposure to the Reference Asset through the use of derivatives rather than a direct investment in the Reference Asset.

Taxation

Please refer to Section 4 "Taxation" of the Master PDS.

Applications and issue of Units

Applications may be accepted or rejected at the discretion of the Issuer. Units will be issued within one month upon receipt of application monies from an Investor. The Unit's economic exposure to the Reference Asset will begin on the Commencement Date. If a Unit is issued prior to the Commencement Date it will have no economic exposure until the Commencement Date.

The Sequoia Future Tech – Series 3 Units will only be issued at the discretion of the Issuer, and applications may be accepted or rejected at the discretion of the Issuer. Without limiting its discretion, the Issuer may choose not to proceed with the issue of the Units for a Series and terminate the product for those Units already issued for any reason whatsoever, including (without limitation) if there is a significant change in the Issuer's cost of hedging between the date of this PDS and the Commencement Date. Where the Issuer has not received the Prepaid Interest, Application Fee or Upfront Adviser Fee (if any) in respect of a Unit(s) from the Investor by the Application Payment Date, the Issuer will cancel the Units relating to the unpaid amounts and will arrange for the Investors name to be removed from the register of Unitholders. If a decision is made for any reason not to issue, or not to proceed with the issue of the Units in Series 3, the Issuer will return the Prepaid Interest, Application Fee and Upfront Adviser Fee (if any) to applicants (without interest) within 10 Business Days of the scheduled Commencement Date and any Units already issued will be terminated.

The Units may mature early in the case of an Early Maturity Event or Issuer Buy-Back, and the Maturity Date may be extended in the case of a Market Disruption Event.

4. Worked Examples

Here are some examples demonstrating how the Performance Coupon is calculated. The examples are hypothetical only and are not forecasts or simulations of Unit returns nor are they a reference to past performance. The actual returns on the Units may be materially different from what is shown in these examples.

These examples may help Investors decide if the Units are a suitable investment. No content in this section or elsewhere in the Term Sheet PDS or PDS is investment advice and Investors should speak to their financial adviser before investing.

4.1 How does the investment perform?

Units may entitle Investors to receive a Performance Coupon at the end of the Investment Term depending on the performance of the Reference Asset. The examples below demonstrate how the Performance Coupon is calculated, and what Investors will receive at Maturity, depending on whether the performance of the Reference Asset over the life of the investment has been negative, positive or neutral.

The examples set out below show the return on an investment in the Units at Maturity.

Rounding:

All calculations made by the Issuer for the purposes of these worked examples will be made to not fewer than two decimal places. Other than as provided in these examples, rounding of numbers will not occur until the final calculation of a relevant amount or number at which time the Investor's entitlements will be aggregated and that aggregate will be rounded so that all money amounts are rounded down to the nearest whole cent and all numbers of Delivery Assets are rounded down to the nearest whole number.

Assumptions:

The below examples assume that Investors decide to invest in 100,000 Units with a AUD \$1.00 Issue Price, resulting in an Investment Amount and Loan Amount of AUD\$100,000 in Series 3.

The below examples also assume that there are no Early Maturity Events, Issuer Buy-Backs, Adjustment Events or Market Disruption Events.

Calculation of the Performance Coupon

There is one potential Performance Coupon payable at Maturity to Investors. This coupon is calculated with reference to the Reference Asset Performance on the Coupon Determination Date.

The following examples show how the net value (that is, the value as reduced by the impact of any relevant Performance Fee) of the Performance Coupon would be calculated based on the assumed Reference Asset Closing Levels set out for Scenario 1 in the table below for a hypothetical investment in Series 3 of 100,000 Units at an Issue Price of AUD\$1.00 per Unit.

Date	Reference Asset Closing Levels		
	Scenario 1 Positive Performance	Scenario 2 Negative Performance	Scenario 3 Moderate Performance
Initial Reference Asset Level on Commencement Date	1400	1400	1400
Final Reference Asset Level at Maturity	1820	1000	1680

Calculate the value of the Performance Coupon

For Scenario 1, the Performance Coupon per Unit would be calculated as follows at the relevant Coupon Determination Date:

Gross Performance Coupon = Max (0, Reference Asset Performance)
= Max [0, (1820 – 1400)/1400]
= 30%

Net Performance Coupon = Gross Coupon x 90%
= 30% x 90%
= \$0.27 AUD per Unit

Based on a holding of 100,000 Units, the Gross Final Coupon would be 30%. After taking into account the impact of Performance Fees, the Net Performance Coupon payable to an Investor would be 27%, or \$27,000 AUD.

Assuming a total cash outlay including interest and fees of \$14,950, the net cash profit generated by the investor after receiving the Performance Coupon over the 2 year term would be \$12,050:

Total Cash Outlay = (\$14,950)

Net Performance Coupon = \$27,000

Net Cash Profit = \$12,050

Overview of Scenarios 1, 2 and 3

The table below sets out the Performance Coupon per Unit which would apply to Scenario 1, 2 and 3. Each of the values listed below for Scenario 2 & 3 were calculated in the same way as set out in the examples above for Scenario 1.

	Scenario 1	Scenario 2	Scenario 3
Gross Performance Coupon per Unit	\$0.30	\$0.00	\$0.20
Net Performance Coupon per Unit	\$0.27		\$0.18
Cash Paid on 100,000 Units	\$27,000	\$0.0	\$18,000
Total Cash Outlay	(\$14,950)	(\$14,950)	(\$14,950)
Net Cash Profit/(Loss)	\$12,050	(\$14,950)	\$3,050
Return on Cash Outlay	80.6%	-100%	20.4%

5. Formulae and Calculations

Coupons

Gross Performance Coupon (AUD) = Max (0, Reference Asset Performance)

Net Performance Coupon (AUD) = Gross Performance Coupon x 90%

The 90% shown in the above formula has the effect of reducing the Gross Coupon by the 10% Performance Fee).

Reference Asset Performance has the meaning given in Section 3 of this PDS.
