No cooling off rights apply to investments in the Units.

**Potential Investors should note that the Issuer retains discretion to amend the closing date for the offer for a Series and move the Commencement Date (and all other consequential dates) for a Series, or not to continue with the issue of a Series of Units on the Commencement Date and terminate any Units in that Series already issued, including where there is a significant change in the Issuer’s cost of hedging between the date of this Term Sheet PDS and the Commencement Date. In particular, the Issuer will not continue with the issue of a Series of Units if it considers that it and its affiliates have not completed sufficient arrangements for management of their respective obligations in respect of that Series of Units. If a decision is made not to issue a Series of Units or to terminate Units in a Series that have already been issued, the Issuer will return the Prepaid Interest, and any applicable Fees that have been paid upfront to applicants without interest within 10 Business Days of the scheduled Commencement Date.**

<b>Performance Coupon</b>	An uncapped Performance Coupon, subject to the performance of the Strongest Performing Strategy and any changes in the AUD/USD exchange rate between the Commencement Date and Maturity, less a 10% Performance Fee.  Refer to “Section 4: Formulae and Calculations” for Performance Coupon formulae		
<b>Strongest Performing Strategy</b>	The Strategy that has the largest positive Series Performance. <i>Max (S&amp;P500 Strategy Series Performance, Gold Strategy Series Performance)</i>  No Performance Coupon is payable if both Strategies have negative Series Performance.		

<b>Strategy</b>	Reference Asset with 14% Volatility Target	
<b>Strategy Performance (calculated for each Strategy)</b>	The percentage amount from the following calculation calculated for both the S&P500 Strategy and the Gold Strategy: $\frac{(\text{Final Strategy Value} - \text{Initial Strategy Value})}{\text{Initial Strategy Value}}$	
<b>Initial Strategy Value</b>	The average of the Strategy Values on the Initial Averaging Dates in respect of each Strategy.	
<b>Final Strategy Value</b>	The average of the Strategy Values on the Final Averaging Dates in respect of each Strategy.	
<b>Strategy Value (calculated for each Strategy)</b>	<p>Each Strategy gives varying levels of exposure to the relevant Reference Asset depending on the volatility of the Reference Asset over the previous 20 and 60 Scheduled Business Days. The Strategy Value is used to determine the varying levels of exposure to the Reference Asset in question.</p> <p>The Strategy Value is calculated each Scheduled Business Day by:</p> <ul style="list-style-type: none"> <li>• taking the change in the level of the relevant Reference Asset from the close of the previous Scheduled Business Day to the close of the current Scheduled Business Day,</li> <li>• multiplying it by the Participation Rate (which determines the exposure to the relevant Reference Asset) from the previous Scheduled Business Day, and</li> <li>• multiplying this amount by the Strategy Value from the previous Scheduled Business Day.</li> <li>• adjusting the Strategy Value by the Index Adjustment Factor that is pro-rated for one Scheduled Business Day. The Index Adjustment Factor reduces the Strategy Value by a percentage of the Strategy Value (1.95% p.a. for Series 51). The Index Adjustment Factor therefore reduces the performance of the Strategy Value and impacts on the returns you receive on your Units.</li> </ul> <p>In this way the Strategy Value will vary from one Scheduled Business Day to the next depending on the change in the level of the Reference Asset and the Participation Rate.</p> <p>The Issuer intends to publish the Strategy Value of each Strategy (on a monthly basis) on its website at <a href="http://www.sequoiasi.com.au">www.sequoiasi.com.au</a>.</p>	<b>Section 4 Formulae and Calculations</b>
<b>Participation Rate and Target Volatility (calculated for each Strategy)</b>	<p>Volatility is the relative rate at which the price of an asset may move (increasing or decreasing), over a period of time. The greater the amount and frequency of an asset's relative price changes (either positively or negatively) over a period of time, the higher the volatility. The higher the volatility of an asset the greater the perceived risk.</p> <p>The Participation Rate is a mechanism designed to manage market risk associated with the performance of the Reference Asset. It operates by varying the exposure that the Strategy will have to the Reference Asset depending on the volatility of the Reference Asset and the Target Volatility. The higher the volatility, the lower the Participation Rate (and hence the lower the exposure to the Reference Asset) and vice versa.</p> <p>Target Volatility is the level of volatility that would provide a Participation Rate of 100%. Each Strategy has a maximum Participation Rate of 100%. Accordingly, Investors will not receive enhanced exposure (above the maximum Participation Rate of 100%) to the Reference Asset even at times of very low volatility. The Participation Rate is determined on each Scheduled Business Day by reference to the higher of the volatility of the Reference Asset over the previous 20 and 60 Scheduled Business Days. The Participation Rates will vary between 0% and 100%.</p> <p>The Participation Rate for each Strategy is determined using the formula set out below.</p> <p>Please refer to Section 4 "Formulae and Calculations" for more information.</p>	<b>Section 4 Formulae and Calculations</b>

**Realised Volatility**

**Realised Volatility(t)** (“RV”) is the Volatility on day t and is determined by taking the greater of:

- i) the historical volatility of the Reference Asset calculated over the previous 20 Scheduled Business Days (Vol1<sub>t</sub>); and
- ii) the historical volatility of the Reference Asset over the previous 60 Scheduled Business Days (Vol2<sub>t</sub>).

$$RV_t = \text{Max} (\text{Vol1}_t, \text{Vol2}_t)$$

Volatility is calculated separately for each Strategy.

Please refer to Section 4 “Formulae and Calculations” for more information.

**Participation Rate**

The Participation Rate for each Strategy will be calculated by reference to the Target Volatility and the level of realised volatility using the following formula:

$$PR_t = \text{Min} (100\%, \text{Target Volatility/Realised Volatility}_t)$$

Based on this, the Participation Rate (PRt) would have been the following as at the 28th of August 2019:

- 57.58% for the S&P500 due to the higher of the 20 and 60 day volatility levels being approximately 24.31%;
- 76.93% for the Gold Strategy due to higher of the 20 and 60 day volatility levels being 18.19%;

As an example, for the S&P500 this is calculated as:

$$\begin{aligned}
 RV_t &= \text{Max} (\text{Vol1}_t, \text{Vol2}_t) \\
 &= \text{Max} (24.31\%, 15.43\%) \\
 &= 24.31\%
 \end{aligned}$$

$$\begin{aligned}
 PR_t &= \text{Min} (100\%, 14\%/24.31\%) \\
 &= 57.58\%
 \end{aligned}$$

Investors should note that there may be a risk that the level of volatility will be high throughout the majority or whole of the Investment Term. Should this occur, the Participation Rate may result in less than 100% exposure to the relevant Reference Asset throughout the majority or whole of the Investment Term. The minimum Participation Rate is 0% which means that Investors have no exposure to the Reference Asset.

Please refer to the Formulae and Calculation Table in Section 4 for the formula that shows how measured volatility is calculated.

**Interest Rate & Prepaid Interest**

The interest rate in respect of the Loan is 5.95% p.a.

The Prepaid Interest is paid upfront for the full 3 year Investment Term.

$$\begin{aligned}
 \text{Prepaid Interest per Unit} &= 5.95\% \text{ p.a.} \times 3 \text{ years} \times \text{AUD } \$1.00 \text{ per Unit} \\
 &= \text{AUD } \$0.1785 \text{ per Unit for the Investment Term of} \\
 &\quad 3 \text{ years.}
 \end{aligned}$$

The Prepaid Interest must be paid to the Issuer by the Application Payment Date.

**Issue Price**

AUD \$1.00 per Unit

**Listing**

The Units will not be listed or displayed on any securities exchange.

**Minimum Investment Amount**

AUD \$50,000 per Series at the Issue Price of AUD \$1.00 per Unit.

**Withdrawal of the Units**

If the Issuer is unable to achieve the economic exposure described in this PDS on the Commencement Date due to any condition set out in this PDS not being satisfied (e.g. the Issuer being unable to hedge its obligations), or otherwise determines not to proceed with the issue for any reason, then the Issuer will terminate any Units already issued, and return the Prepaid Interest and Fees without interest. The Loan will be terminated and no drawdown will be made.

<b>Minimum Buy-Back Amount</b>	50,000 Units per Series providing Investors continue to hold at least 50,000 Units in the relevant Series. In the event that an Investor makes an Issuer Buy-Back Request which would result in the Investor holding less than 50,000 Units in a particular Series, then the Issuer will notify the Investor that it will hold less than 50,000 Units and seek the Investor's instruction whether to buy back the Investor's entire holding in that Series or reject the request.
<b>Minimum Early Maturity Value, Termination Payment and Buy-Back Price</b>	<p>AUD \$1.00</p> <p>If the Units mature early for any reason, you will receive an Early Maturity Value of AUD \$1.00 which will be applied to your Loan. You will not have to pay any other fees, costs or interest.</p> <p>Investors will not be entitled to a refund of any Prepaid Interest or any other Fees paid in relation to the Units and will not be entitled to any Performance Coupon or payment of the Final Value (as the Final Value of AUD \$1.00 will be used to pay off your Loan).</p> <p>Please refer to Section 1.10 "Early Maturity" of the Master PDS for more information on when the Units can mature early.</p>
<b>Beneficial Interest</b>	The Beneficial Interest in a Portion of the Delivery Asset held for each Unit an Investor holds. The Beneficial Interest will be set out in the Confirmation Notice sent to Investors and is a feature of the product designed to ensure the Units are a "security" under the Corporations Act.
<b>Delivery Asset</b>	<p>Telstra Corporation (TLS.AU).</p> <p>On Maturity, the Issuer intends to deliver a parcel equal in value to the Final Value per Unit multiplied by the number of Units held by an Investor ("<b>Delivery Parcel</b>") containing ordinary shares in Telstra Corporation (ASX Code: TLS, website: www.telstra.com.au) ("<b>Delivery Asset</b>").</p> <p>You should be aware that the Issuer can change or substitute the Delivery Asset in certain circumstances, and you should take this into account when considering whether to invest in the Units.</p>
<b>Agency Sale Option</b>	Available. Please refer to Clause 4.4 of Section 6 "Terms of the Deferred Purchase Agreement" in the Master PDS.
<b>Key Risks</b>	<p>Key risks include:</p> <ul style="list-style-type: none"><li>• Your return (including any Coupons) is affected by the performance of the Reference Assets (S&amp;P500 and Gold). There is no guarantee that the Reference Assets will perform well.</li><li>• The Units have varying levels of exposure to the Reference Assets depending on volatility due to the variable Participation Rate. It operates by varying the exposure that the Units will have to the Reference Asset depending on the Realised Volatility of each Reference Asset and the Target Volatility. There is the risk that the Participation Rate could drop to significantly below 100% during the Investment Term in which case Investors will not gain the full benefits of an increase of the value of the Reference Asset.</li><li>• Investors should note that there is a lag in measuring the Realised Volatility of the Reference Asset. This means that where there has been a period of high Realised Volatility, the Investor's exposure to the Reference Asset will be low, regardless of whether the Reference Asset is performing positively or negatively.</li></ul>

- There will be no Performance Coupon payable if the Series Performance for each Strategy is negative on the Performance Coupon Determination Date.
- The Performance Coupon is determined by reference to the Initial Strategy Value and Final Strategy Value for the Strongest Performing Strategy at Maturity as well as changes in the AUD/USD exchange rate. An increase in the AUD/USD exchange rate will decrease the Performance Coupon whilst a fall in the AUD/USD exchange rate will increase the Performance Coupon.
- The Initial and Final Strategy Values are subject to averaging. Averaging may decrease the impact of an increase in the relevant Reference Asset during the Investment Term.
- There is no guarantee that the Units will generate returns in excess of the Prepaid Interest and Fees, during the Investment Term. Additionally, in the event of an Investor requested Issuer Buy-Back or an Early Maturity Event you will not receive a refund of your Prepaid Interest or Fees.
- Gains (and losses) may be magnified by the use of a 100% Loan. However, note that the Loan is a limited recourse Loan, so you will never be required to pay more than the Prepaid Interest Amount and Fees at Commencement.
- Investors are subject to counterparty credit risk with respect to the Issuer and the Hedge Counterparty;
- Gains and losses may be magnified by the use of a 100% limited recourse Loan; and
- the Units may mature early following an Early Maturity Event, including an Adjustment Event, Market Disruption Event or if the Issuer accepts your request for an Issuer Buy-Back.

Please refer to Section 2 “Risks” of the Master PDS for more information.

### **Risk Management Fee**

There is a Risk Management Fee of 0.7% p.a. of the Issue Price paid upfront for the full 3 year Investment Term.

The Risk Management Fee is a fee charged for managing the volatility (a measure of risk) of each Strategy (through the Participation Rate). The Issuer aims to ensure that the volatility of each Strategy is equal to or less than the level of the Target Volatility, however, there is no guarantee that this level of volatility will be achievable throughout the Investment Term.

Risk Management Fee per

Unit = 0.7% p.a. x 3 years x \$1.00 per Unit

= \$0.021 per Unit for the Investment Term of 3 years. The Risk Management Fee must be paid to the Issuer by the Application Payment Date.

Therefore, if you invested the Minimum Investment Amount of \$50,000 for the Units, in addition to any Interest and other Fees paid in relation to the Units, you would pay a Risk Management Fee of \$1,050 on the Application Payment Date.

### **Performance Fee**

Any Performance Coupon is subject to a 10% Performance Fee. The Performance Fee has the effect of reducing the gross amount of any Coupon payable to the Investor. For example, if a 10% Performance Coupon is payable, then the Net Amount payable to the investor would be 9% after the deduction of the Performance Fee, ignoring the impact of changes to the AUD/USD exchange rate. If the Performance Coupon is 0%, then no Performance Fee is payable.

## Other Fees

The following Fees are payable in respect of the Units (in addition to the Performance Fee and Risk Management Fee, which are each discussed above):

**Upfront Adviser Fee (if any):** You may nominate an Upfront Adviser Fee to be paid to your Adviser in the Application Form attached to this Term Sheet PDS. The Issuer will deduct any Upfront Adviser Fee from the Total Payment Amount and pay it to your Adviser in accordance with the terms of this PDS.

**Application Fee:** The Issuer charges an Application Fee of 2.20% of the Issue Price of each Unit, i.e. AUD \$0.022 per Unit. The Issuer may agree with your Adviser to forgo part or all of the Application Fee at the Issuer's absolute discretion.

Total Investment Cost	Type of Cost	Cost per Unit
	Prepaid Interest	\$0.1785
	Risk Management Fee	\$0.021
	Application Fee	\$0.022
	<b>Total:</b>	<b>\$0.2215</b>

## Derivatives

The Issuer obtains exposure to the Strategy through the use of derivatives rather than a direct investment in the Strategy, Reference Asset or securities comprising the Reference Asset.

## Taxation

Please refer to Section 4 "Taxation" of the Master PDS.

## Applications and issue of Units

Applications may be accepted or rejected at the discretion of the Issuer. Units will be issued within one month upon receipt of application monies from an Investor. The Unit's economic exposure to the Reference Asset will begin on the Commencement Date. If a Unit is issued prior to the Commencement Date it will have no economic exposure until the Commencement Date.

The Sequoia Launch Series 51 Units will only be issued at the discretion of the Issuer, and applications may be accepted or rejected at the discretion of the Issuer. Without limiting its discretion, the Issuer may choose not to proceed with the issue of the Units for a Series and terminate the product for those Units already issued for any reason whatsoever, including (without limitation) if there is a significant change in the Issuer's cost of hedging between the date of this PDS and the Commencement Date. Where the Issuer has not received the Prepaid Interest, Application Fee, Upfront Adviser Fee (if any) or Risk Management Fee in respect of a Unit(s) from the Investor by the Application Payment Date, the Issuer will cancel the Units relating to the unpaid amounts and will arrange for the Investors name to be removed from the register of Unitholders.

If a decision is made for any reason not to issue, or not to proceed with the issue of the Units in Series 51, the Issuer will return the Prepaid Interest, Application Fee, Risk Management Fee and Upfront Adviser Fee (if any) to applicants (without interest) within 10 Business Days of the scheduled Commencement Date and any Units already issued will be terminated.

The Units may mature early in the case of an Early Maturity Event or Issuer Buy-Back, and the Maturity Date may be extended in the case of a Market Disruption Event.

# 3. Worked Examples

Here are some examples demonstrating how the Performance Coupon is calculated. The examples are hypothetical only and are not forecasts or simulations of Unit returns nor are they a reference to past performance. The actual returns on the Units may be materially different from what is shown in these examples.

These examples may help Investors decide if the Units are a suitable investment. No content in this section or elsewhere in the Term Sheet PDS or PDS is investment advice and Investors should speak to their financial adviser before investing.

## 3.1 How does the investment perform?

The Units may entitle Investors to receive a Performance Coupon at the end of the Investment Term depending on the Series Performance of the Strongest Performing Strategy. The examples below demonstrate how the Performance Coupon is calculated, and what Investors will receive at Maturity, depending on whether the performance of the Strongest Performing Strategy over the life of the investment has been negative, positive or neutral.

The examples set out below show the return on an investment in the Units at Maturity.

### Rounding:

All calculations made by the Issuer for the purposes of these worked examples will be made to not fewer than two decimal places. Other than as provided in these examples, rounding of numbers will not occur until the final calculation of a relevant amount or number at which time the Investor's entitlements will be aggregated and that aggregate will be rounded so that all money amounts are rounded down to the nearest whole cent and all numbers of Delivery Assets are rounded down to the nearest whole number.

### Assumptions:

The below examples assume that Investors decide to invest in 50,000 Units with a AUD \$1.00 Issue Price, resulting in an Investment Amount and Loan Amount of AUD\$50,000 in Series 51.

The below examples also assume that there are no Early Maturity Events, Issuer Buy-Backs, Adjustment Events or Market Disruption Events, and that the Investor elects to use the Agency Sale Option.

### Calculation of the Performance Coupon

There is one potential uncapped Performance Coupon payable to Investors at the end of the Investment Term. It is calculated by reference to the Series Performance of the Strongest Performing Strategy on the Performance Coupon Determination Date after deducting the 10% Performance Fee and adjusting for changes in the AUD/USD exchange rate.

The following examples show how the net value (that is, the value as reduced by the impact of any relevant Performance Fee) of the Performance Coupon would be calculated, based on the assumed Strategy Values set out for Scenario 1 in the table below for a hypothetical investment in Series 51 of 50,000 Units at an Issue Price of AUD\$1.00 per Unit.

### Identifying the Strongest Performing Strategy

First, the Series Performance is calculated with reference to each Strategy:

$$\text{Series Performance} = \frac{(\text{Final Strategy Value} - \text{Initial Strategy Value})}{\text{Initial Strategy Value}}$$

	S&P500 Strategy	Gold Strategy
<b>Initial Strategy Value</b>	103	98
<b>Final Strategy Value</b>	133	145
<b>Series Performance</b>	$= (133 - 103)/103$ $= 29.13\%$	$= (145 - 98)/98$ $= 47.96\%$

In this example, the Strongest Performing Strategy is that Strategy where Gold is the Reference Asset. As such, the Strategy Value for this Strategy on Gold is used for the purpose of calculating the Performance Coupon in this example.

Strategy Values for the Strongest Performing Strategy (Gold)				
Date	Scenario 1 Positive Performance	Scenario 2 Negative Performance	Scenario 3 Moderate Performance	AUD/USD exchange rate (Series Spot rate)
<b>Initial Strategy Value:</b>	98	98	101	0.67
<b>Final Strategy Value</b>	145	91	129	0.60

## Calculate the value of the Performance Coupon at Maturity

For Scenario 1, the Net Performance Coupon per Unit would be calculated as follows at the relevant Coupon Determination Date by reference to the Strongest Performing Strategy:

$$\begin{aligned} \text{Gross Performance Coupon} &= \text{Max}(0, (\text{Final Gold Strategy Value}/\text{Initial Gold Strategy Value} - 1)) \\ &= \text{Max}(0, (145/98 - 1)) \\ &= 47.96\% \end{aligned}$$

$$\begin{aligned} \text{Net Performance Coupon} &= \text{Gross Coupon} \times 90\% \times (\text{Series Spot Rate}_{y_0}/\text{Series Spot Rate}_{y_2}) \\ &= 47.96\% \times 90\% \times 0.67/0.60 \\ &= \$0.482 \text{ AUD per Unit} \end{aligned}$$

Based on a holding of 50,000 Units, the Gross Performance Coupon would be 47.96%. After taking into account the impact of Performance Fees and changes in the AUD/USD exchange rate, the total amount of the Net Performance Coupon payable to an Investor would be \$24,100 AUD.

Assuming a total cash outlay including interest and fees of \$11,075, the net cash profit generated by the investor after receiving the Performance Coupon of \$24,100 would be \$13,025:

$$\begin{aligned} \text{Total Cash Outlay} &= (\$11,075) \\ \text{Net Performance Coupon} &= \$24,100 \\ \text{Net cash Profit} &= \$13,025 \end{aligned}$$

## Overview of Scenarios 1, 2 and 3

The table below sets out the Coupons per Unit which would apply to Scenario 1, 2 and 3. Each of the values listed below for Scenario 2 & 3 were calculated in the same way as set out in the examples above for Scenario 1.

	Scenario 1	Scenario 2	Scenario 3
Net Performance Coupon per Unit	\$0.4820	\$0.00	\$0.2786
Net Performance Coupon paid on 50,000 Units	\$24,100	\$0.0	\$13,930
Less Total Investment Cost	(\$11,075)	(\$11,075)	(\$11,075)
<b>Net Cash Profit/(Loss)</b>	<b>\$13,025</b>	<b>(\$11,075)</b>	<b>\$2,855</b>

## 4. Formulae and Calculations

<b>Strongest Performing Strategy</b>	The Strategy that has the largest positive Series Performance during the Investment Term determined as follows: <i>Max (S&amp;P500 Strategy Series Performance, Gold Strategy Series Performance)</i> No Performance Coupon is payable if both Strategies have negative Series Performance.
<b>S&amp;P500 Strategy – Series Performance</b>	In relation to the S&P500 Strategy: Series Performance = $\frac{(\text{Final Strategy Value} - \text{Initial Strategy Value})}{\text{Initial Strategy Value}}$
<b>Gold Strategy – Series Performance</b>	In relation to the Gold Strategy: Series Performance = $\frac{(\text{Final Strategy Value} - \text{Initial Strategy Value})}{\text{Initial Strategy Value}}$
<b>Initial Strategy Value</b>	The average of the Strategy Values on the Initial Averaging Dates in respect of each Strategy
<b>Final Strategy Value</b>	The average of the Strategy Values on the Final Averaging Dates in respect of each Strategy
<b>Strategy Value</b>	The Strategy Value (“SV”) is calculated separately for each Strategy and is the value of the Strategy providing exposure to the Reference Asset with a variable exposure (through a variable Participation Rate) depending on the Realised Volatility of the Reference Asset and a Target Volatility of 14%. The Strategy Value of each Strategy will start at 100 on the Commencement Date. $SV_{(t)} = SV_{(t-1)} \times [1 + \{ \text{Participation Rate}_{(t-1)} \times (\text{Reference Asset}_{(t)} / \text{Reference Asset}_{(t-1)} - 1) \}] - (\text{Strategy Value}_{(t-1)} \times \text{Index Adjustment Factor} \times \text{Act}_t / 360)$ <i>Where:</i> <b>SV<sub>(t)</sub></b> means the Strategy Value on Scheduled Business Day <sub>(t)</sub> <b>SV<sub>(t-1)</sub></b> means the Strategy Value on Scheduled Business Day before <sub>(t)</sub> <b>Participation Rate<sub>(t-1)</sub></b> means the Participation Rate on Scheduled Business Day before <sub>(t)</sub> <b>Index Adjustment Factor</b> is set at 1.95% p.a. <b>Act<sub>t</sub></b> is the number of calendar days since the Strategy Value was last calculated which ensures that calculations are on a daily accruals basis
<b>Participation Rate</b>	The Participation Rate (PR) is calculated separately for each Strategy as: $PR = \text{Min} (100\%, \text{Target Volatility} / \text{Realised Volatility}_{(t)})$ <i>Where:</i> <b>Target Volatility</b> is 14% <b>Realised Volatility<sub>(t)</sub></b> (“RV”) is the Volatility on day t and is determined by taking the greater of: i) the historical volatility of the Reference Asset calculated over the previous 20 Scheduled Business Days (Vol1 <sub>t</sub> ) and; ii) the historical volatility of the Reference Asset over the previous 60 Scheduled Business Days (Vol2 <sub>t</sub> ). The Participation Rate (PR) is calculated as: $RV_t = \text{Max} (\text{Vol1}_t, \text{Vol2}_t)$ $\text{Vol1}_t = \sqrt{252} \times \left[ \sum_{i=t-19}^t \frac{1}{20} \times \text{Ln} \left( \frac{\text{Reference Asset}_t}{\text{Reference Asset}_{i-1}} \right)^2 \right]^{0.5}$ $\text{Vol2}_t = \sqrt{252} \times \left[ \sum_{i=t-59}^t \frac{1}{60} \times \text{Ln} \left( \frac{\text{Reference Asset}_t}{\text{Reference Asset}_{i-1}} \right)^2 \right]^{0.5}$ Where i or i-1 is a negative number, this represents a number of Scheduled Business Days prior to the Commencement Date.
<b>Reference Asset<sub>(t)</sub></b>	In the case of the Gold Strategy, Reference Asset (t) means the LBM Gold Price PM as published at 15:00 London time by the LBA on any Exchange Business Day <sub>(t)</sub>
<b>Reference Asset<sub>(t-1)</sub></b>	In the case of the S&P500 Strategy, Reference Asset <sub>(t)</sub> means the S&P500 Index (PR) Closing Level as published on the close of trading on the NYSE on the Exchange Business Day before <sub>(t)</sub> . In the case of Gold, Reference Asset <sub>(t)</sub> means the LBM Gold Price PM as published at 15:00 London time by the LBA on the Exchange Business Day before <sub>(t)</sub>

## Coupons

Gross Performance Coupon =  $\text{Max}(0, \text{Max}[\text{S\&P500 Strategy Series Performance, Gold Strategy Series Performance}])$

Net Performance Coupon =  $\text{Gross Performance Coupon} \times 90\% \times (\text{Series Spot Rate}_{y_0} / \text{Series Spot Rate}_{y_3})$

Where:

**Initial Strategy Value** The average of the Strategy Values on the Initial Averaging Dates

**Final Strategy Value** The average of the Strategy Values on the Final Averaging Dates

**Series Spot Rate<sub>y<sub>0</sub></sub>** means the relevant AUD/USD spot rate at Commencement Date.

**Series Spot Rate<sub>y<sub>3</sub></sub>** means the relevant AUD/USD spot rate at the Maturity Date.

(The 90% shown in the above formulas has the effect of reducing the Gross Coupon by the 10% Performance Fee).
